JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

*Leper at Mississippi River Quarantine Station brought from Canary Islands to be deported.*

[Telegram.]

NEW ORLEANS, LA., July 25, 1901.

Quarantine regulations regarding leper arriving on steamship *Miguel Gallart* thoroughly carried out. Patient detained at Mississippi River Quarantine and vessel disinfected. Leper will be deported by same vessel.

WERTENBAKER.

[This patient was a stowaway on the Spanish steamship *Miguel Gallart* from the Canary Islands.]

*Smallpox reported at Kluckwan, Alaska.*

JUNEAU, ALASKA, July 26, 1901.

SIR: Marshal Shoup received word this morning from his department at Porcupine that smallpox had broken out at Kluckwan. This Indian camp is right on the trail, and all who go to or from the Porcupine must pass through it. No particulars were given, but it has been the rule for it to go all through a camp once it started, and the Indians are leaving as fast as they can get away.

On July 3 I intercepted 3 canoes with 11 Indians in them, with 10 cases of smallpox just recovered. They were all sent to the pesthouse and fumigated and made to take a bath. The 1 case that had escaped was a woman that had had syphilis, and had been vaccinated about two years ago.

I have a great deal of trouble enforcing regulations, as a great many say it is not smallpox or some of the white people would take it. And again, if it was smallpox more of them would die.

I have further to report, as the steamship *Cottage City* was making her landing last night (1 a. m.), a longshoreman fell off the dock and was drowned, the body being recovered in one hour. He fell a distance of about 24 feet, sank before a boat could reach him, and did not come to the surface again.

Respectfully,

SAML. C. LEONHARDT,  
*Acting Assistant Surgeon, U. S. M. H. S.*

*End of smallpox in Duluth, Minn.*

DULUTH, MINN., July 27, 1901.

SIR: I have the honor to report that there are, as far as my department is able to discover, no cases of smallpox in this city, this being the first time this happy state of affairs has existed since August, 1900.

Respectfully,

J. M. ROBINSON,  
*Commissioner of Health.*

*Smallpox in Buffalo and Gowanda, N. Y.*

BUFFALO, N. Y., July 29, 1901.

SIR: I have the honor to state for your information that during the past week there has been detected and isolated in this city an additional case of smallpox in the person of an Italian immigrant (child) who was found suffering from the disease in the early eruptive stage at one of the railway depots. The mother stated that they had sailed from Italy
